Novation to demo latest hardware & software features at ISC-West in Vegas

Westlake Village, CA, March 28th, 2008 – Novation Wireless Security Systems, LLC, will be showing the latest hardware and software features of their *nSeries* family of wireless access control products at next weeks ISC-West event in Las Vegas. The *nSeries* product-line is a Dealer focused product targeted towards small to medium sized applications which substantially reduces installation cost to less than 30 minutes per door. Novation's innovative, patent pending technology offers all the features expected in a hard-wired system in a *wireless* system that requires no drilling, no AC power, and no wiring at the door.

Novation Wireless Security Systems, LLC provides revolutionary technology which drastically reduces installation cost without sacrificing security. Tim McCarthy, Novation's VP of Engineering said, "We are very excited about the most recent improvements in the *nSeries* line. Our Dealers and Integrators will appreciate the new features now available.

The *nSeries* now includes a hand-held range tester (*nRange*), and system features such as LAN/WAN Communications and email support for alarm notifications. Field reversible handing on the *nLock* and API support of the Security Center Software were also added to Novation's offering.

Show attendees can see a working demo of all Novation's new features at their booth #27127. The ISC-West show dates run April 2nd thru April 4th. www.iscwest.com
